Director, RDIAS

FORM A

Proposal:

- **Name of the event organized:** Plantation of Saplings for the Members of RDIAS Family.
- **Date:** March 26th 2018.
- **Venue:** Garden Area
- **Motivation for the activity:** Planting trees is one of the easiest and most sustainable ways to positively affect the environment. We need trees now more than ever! Communities across the state have been devastated with the loss of millions of trees and hence to save and plant trees is the need of the hour. All the students volunteers and few faculty member were gathered at the Garden area and planted the saplings
- **Organized by:** Social & Heritage Club of RDIAS

FORM B

Part I

Aim of the event:

The aim of the event was to spread awareness amongst students for making our environment a safe and better place to live in.

Part II

Abstract:

Issues of environment cleanliness and safety are of utmost importance to humankind today. It is extremely necessary to make our younger generation realize the significance of living in safe and hygienic conditions. Global warming has been spreading its wings all over the world and giving rise to various pollution problems. We all can contribute in our own small ways towards making our planet a greener, more beautiful and healthy place to live in.

With this aim, the Social and heritage Club of RDIAS organized the activity of plantation of sapling. Student volunteers and few faculty members were involved in the plantation of sapling in the garden area. The students with full zeal learnt how to plant a seed and water it to give it life. More importantly they realized how their small effort of planting a tree can contribute big for the generations to come.

Part III

Conclusion:

Different themes and different ideas are generated every year to for doing something positive for the environment. But are we really participating? The activity helped the students to participate in this noble deed through a small effort of planting saplings. That is the least we can give back to nature. If each one of us participates in the same manner, it can make a big difference towards protecting our nature.
