Guest Lecture on “Latest Trends and Technologies in JAVA”

Topic :	Latest Trends and Technologies in JAVA for the students of MCA II and IV by Mr. Deepanshu, Team Leader, IBM
Date of event :	January 15, 2013
Aim of the Event :	The aim of event was to make the students aware about the emerging demand for JAVA professionals. The event was really beneficial, especially for those who want to be an application developer in JAVA in near future.
Description of the event :	<p>The speaker started his lecture by discussing the areas and application of JAVA, its features etc. The agenda was:</p> <ul style="list-style-type: none"> ✚ Introduction to JAVA. ✚ Need of JAVA. ✚ Why S/W Developers prefer JAVA. ✚ Client Demands. ✚ 101 reasons for choosing JAVA. <p>Sir carried out an interactive session with the faculty members and student gathering and explained the dynamics involved in the project development process to start with.</p> <p>He expounded on the need of delivering an efficient, flexible, reliable, secure, and an easy- and fast-to-build system which has created a widespread</p>

Conclusion:

market for Java. He covered numerous features of Java such as faster development turnaround, cross platform language integration, aspect oriented programming, and painless upgradeability of projects which ensure Java to be a preferred choice by both the software developer community as well as the clients.

The session ended with the speaker encouraging students to build a strong base in learning Java and update themselves with the latest technologies in advanced Java.
