

Web Report on Guest Lecture on “Android Technologies”

Title	Guest Lecture on “Android Technologies” for the students of MCA
Date	September 3, 2015
Resource Person/Facilitator	Mr. Pulkit Jain, SAMSUNG Research Institute (SRIN),.
Summary	<p>Now days there is a buzz about this new technology named Android which is a Linux based OS for mobile technologies and tablet computers. It is an Open Source which is specially designed for the applications only. It is an upcoming development tool which can be used to develop small and big applications.</p> <p>Keeping in view the growing importance of android technologies a guest lecture was organized by MCA Department which gave a hands-on experience on the topic to the students specially connectivity to the databases. Since students of MCA-III and MCA-V Semester have already undergone a four weeks training on android technologies during their summer break and have also developed small applications, so it was a highly interactive session where students clarified their doubts and enhanced their knowledge and skills.</p> <p>Sir also offered few of the students an internship in Android Application Development under his guidance as he himself is working in the development of three applications of commercial use. He further appreciated our students for their knowledge in this new technology.</p>
