

## Web Report on Session – “Cryptocurrency and Stock Trading”

<b>Title</b>	Guest Lecture on Cryptocurrency and Stock Trading
<b>Date</b>	January 30, 2018
<b>Resource Person / Facilitator</b>	Mr. Rajesh Kumar Gupta, Managing Director at Ameva Securities Pvt Ltd.
<b>Summary</b>	<p>The speaker started the session by questioning the students about Stock Trading to understand their basic knowledge about the subject. Sir explained that a stock market is an equity market or share market. The aggregation of buyers and sellers of stocks also called shares represent ownership claims on business which may include securities listed on a public exchange as well as those only traded privately.</p> <p>Sir enlightened the students on “<b>How to start Investment?</b>” and explained that investing and trading are two very different methods of making profit in the financial markets. The goal of investing is to gradually build wealth over an extended period of time through the buying and holding of a portfolio of stocks, baskets of stocks, mutual funds, bonds and other investment instruments.</p> <p>Sir also talked about <b>Cryptocurrency</b> which is a digital or virtual currency designed to work as a medium of exchange. It uses cryptography to secure and verify transactions as well as to control the creation of new units of a particular cryptocurrency. Afterwards Sir elaborated upon the concept of “<b>Money of the Future</b>”. Cryptocurrencies make it easier to transfer funds between two parties in a transaction. These transfers are facilitated through the use of public and private keys for security purposes. These fund transfers are done with minimal processing fees, allowing users to avoid the steep fees charged by most banks and financial institutions for wire transfers.</p> <p>The lecture delivered was appreciated by the students. The topic was very</p>

	<p>interactive and affirmative. The key leaning of the lecture was, it made students aware about the various latest digital currencies. Overall, cryptocurrencies have a long way to go before they can replace credit cards and traditional currencies as a tool for global commerce.</p>
