

“Guest Lecture on Java”

Topic :	Managing Programs: Java Advanced Fine Solutions for the students of MCA II and IV Semester
Date of event :	March 5, 2012
Aim of the Event	RDIAS organized a Guest Lecture on Managing Programs: Java Advanced Fine Solutions. The session was conducted by Mr. Manish Bhatia, Sr. Java Consultant, Ducat. The session intended at providing students with practical knowledge about utilizing frameworks for creating various applications.
Description of the event	<p>The speaker started with the introduction of what exactly is Java. He introduced the basic and most important features of Java with examples to lay a strong foundation.</p> <p>When Java was developed initially as OAK, even its developers were not sure in the direction in which the technology would grow. Java has actually taken an unexpected turn around as a development technology. The speaker then went on to discuss various upcoming technologies like Hibernate, Struts and Spring. He also spoke of the life cycle of servlets and talked about the need of application server and web server. JAVA programming enables secure and high performance software development on multiple platforms. Many companies in India have well-qualified software engineers having expertise in Java, Java Script, J2SE, JSP, and J2ME.</p>

	<p>JAVA Programming Services help our businesses to do better. They provide variety of Java development services including project solutions.</p> <p>The session ended with a question answer round, where students clarified their doubts about different versions of Java and its platform independence.</p> <p>The lecture was very much appreciated by all students and faculty members.</p>
