Guest Lecture on “.NET”

Topic :	Introduction to .NET by Ramraksha Mishra, .NET Developer, Polygon Technologies Pvt. Ltd.
Date of event :	January 28, 2013
Aim of the Event :	<p>The aim of event was to make the students aware about the emerging demand for .Net professionals.</p> <p>The event was really beneficial, especially for those who want to be a developer in .Net in near future.</p>
Description of the event :	<p>The speaker started his lecture by discussing the areas and application of .NET, its features etc. The agenda was:</p> <ul style="list-style-type: none">• Introduction to .NET.• What does .NET give you?• .NET Framework• ASP.NET• Some practical implementation in .NET. <p>Sir carried out an interactive session with the faculty members and student gathering and explained the dynamics</p>

involved in the project development process to start with. He explained NET Framework is made up of two major components: the common language runtime (CLR) and the framework class library (FCL). The CLR is the foundation of the .NET Framework and provides various services that applications can use. The CLR also forms the “environment” that other applications run on.

Conclusion:

The session was beneficial and explained that Net is a Platform.

.Net supports languages like C#,vb,python and many more.

.Net is famous for Rapid Application Development(RAD).

.Net allows us to build a very attractive website using asp.net
