

## Guest Lecture on “Practical Implementation of .NET Concepts”

<b>Topic :</b>	<b>Practical Implementation of .NET Concepts</b> by Ms. Sunanda & Mr. Rahul Sharma, Head of Center NIIT
<b>Date of event :</b>	April 5 , 2013
<b>Aim of the Event :</b>	The aim of this session was to make the students aware about various applications of .NET in today's environment. The session aimed at lending insight to students into the field of dot net application developer.
<b>Description of the event :</b>	Sir started his session from the very beginning talking about history and need of .NET. NET is the Microsoft Web services strategy to connect information, people, systems, and devices through software. Integrated across the Microsoft platform, .NET technology provides the ability to quickly build, deploy, manage, and use connected, security-enhanced solutions with Web services. Following topics were covered during the lecture:

✚ Object Oriented Basics & the Need of Programming Framework.

How Dot Net can be used better for better applications.

The New Trends in Programming and Domains.

✚ The Kinds of Applications which will be developed in coming years by Software Industry.

Security issues in Dot Net Programming. Let's Hack the World using Dot Net.

✚ Live demo of various applications of dot net like Text to speech convertor, chat messenger, hacking and access your desktop remotely.

Sir carried out an interactive session with the faculty members and students. He demonstrated programming code for various applications which students can implement at their end. The session ended with sir encouraging students to build a strong base in learning .NET and update themselves with the latest technologies.
