

Guest Lecture on “PHP Programming”

Topic	Guest Lecture on “PHP Programming” for the students of MCA
Date of Event	March 27, 2015
Resource Person	Mr. Amit Bhardawaj, Team Lead Web Technologies at Leeway Hertz Technologies.
Description of the Event	<p>PHP is an open source, server-side scripting language that runs on more than 20 million websites and powers high-profile sites we deal with every day, including Facebook and Wikipedia. Any blog, news site or other website built using Wordpress or Drupal is making use of PHP as well. Keeping in mind the increasing demand of PHP, a guest lecture was organized for the students of MCA with a motive to expose students to some practical insights of the language which will motivate them to learn further.</p> <p>The lecture was scheduled from 11:30 a.m. to 1:30 pm at RDIAS lecture theatre where all the students of MCA-II and MCA-IV assembled. Mr. Amit Bhardwaj being the Team Lead Web Technologies at Leeway Hertz opened the forum to answer the student queries and guided them. He started with the basics of PHP while throwing some light on need and demand of the language.</p> <p>Then to provide the students with practical insights and make students work on this technology simultaneously, students were moved to computer center where Mr. Amit showed them actual implementations on basics, networking etc.</p> <p>Though it is impossible to learn each and every aspect of any technology in two hours but yet it was a nice experience for the students to get exposed to “How PHP works” while learning some basics.</p>
