

## “Guest Lecture on Generics and Collections using Java Eclipse”

Topic :	Generics and collections using Java Eclipse, delivered by Mr. Deepanshu Chopra, Technical Team Lead at IBM Gurgaon.
Date of event :	October 7, 2012
Aim of the Event :	<p>The aim of conducting the session was to guide students about the two most important concepts used in Java Eclipse. The concept of Applet and Java collections are the concepts which are in high demand by the industry today.</p> <p>Practical knowledge of these terms will help students in Technical Round for company placements.</p>
Description of the event :	<p>The speaker started his lecture by delivering the basic concepts used in java collection, interfaces, implementations, and algorithms in the Java collections framework. He gave many examples of real life to relate with these concepts to satisfy the students.</p> <p>Sir also gave an assignment to students to check their knowledge.</p>
