

## Guest Lecture on Java

Topic :	Significance of Java in industry and reasons for client preference, conducted by Mr. Dipanshu Chopra, Technical Team Lead at IBM Gurgaon
Date of event :	August 4, 2012
Aim of the Event :	The aim of this session was to create awareness among students about the reasons why 75% of enterprise software development is being performed on Java today, thus giving them an insight into its varied benefits.
Description of the event :	<p>The speaker carried out an interactive session with the faculty and student gathering and explained the dynamics involved in the project development process to start with.</p> <p>He expounded on the need of delivering an efficient, flexible, reliable, secure, and an easy-and fast-to-build system which has created a widespread market for Java. He covered numerous features of Java such as faster development turnaround, cross platform language integration, aspect oriented programming, and painless upgradeability of projects which ensure Java to be a preferred choice by both the software developer</p>

	<p>community as well as the clients.</p> <p>JAVA's demand and usability is proved by its popularity in market ranging from finance, FMCG, to telecom sector.</p> <p>The session ended with the speaker encouraging students to build a strong base in learning Java and update themselves with the latest technologies in advanced Java.</p>
