

Website Report on “Yamuna Bio- Diversity Park”

Title	Industrial visit to Yamuna Bio- Diversity park
Date	October 6, 2017
Resource Person/Facilitator	Mr. Pranjai Jain, Nature Education Officer
Summary	<p>An industry visit to Yamuna Bio- Diversity park was organized for students of MBA & BBA. Around 38 students and 2 faculty members visited the park. In the beginning, an informative session was planned for the students where they were introduced to the R&D programs initiated by the Bio diversity park to better serve the nation in terms of environment, herbal garden, sacred grove, and range land while the other loop leads to the butterfly conservatory and amphitheater.</p> <p>Further, students visited Bio-Diversity park and witnessed the different types of plant and various bread of butterfly. The Park comprises a native flora and fauna which has its existence since 100 years and is becoming extinct locally. It further, acts as a natural conservation site for specific group of endangered plants. Students also observed the process of maintaining and cleaning Yamuna river water.</p> <p>Beyond the academics, this industry visit has provided a real perspective to the students learning as it helped to combine the theoretical knowledge with the exposure in management field. Thus, it offered an opportunity to learn through interaction and working methods of bio diversity park. It was a wonderful experience for the students.</p>
