Special talk on "Cancer Awareness among women- Yes2Life"

TITLE	Special talk on "Cancer Awareness among women- Yes2Life"
Date	Feb 06, 2019 - Feb 06, 2019
Summary	<p>A special talk on cancer awareness was organized by NGO "Yes2life" for our female students of MBA & BBA in order to provide the awareness of breast cancer . The aim of this NGO is to reduce the mortality rate arising from breast cancer making people aware so that the disease can be diagnosed at an early stage and families can be saved. Dr. Neeti Chhabra and Ms. Shruti Sharma addressed the students regarding how to deal with such situations . With the help of presentation the speaker explained in detail about how to identify the breast cancer causing symptom and how to undergo the procedure of testing and the proper treatment required which many people are still unaware about. With the live examples of themselves Dr. Neeti and Ms Shruti explained how they beat the lump and rediscovered life and now many other such women joined their NGO for well being for others in this journey.</p> <p>This fascinating session made students realize that breast cancer in India is increasing and it has become one of the most common cancer in women. The mortality rate still can be declined if breast cancer is diagnosed at an early stage. They suggested students to do self exam or timely health check up in order to avoid delay in identifying any cancerous symptoms. They told students that they aim to provide support for investigative tests & screenings, treatment and rehabilitation for women.</p> <p>This session also helped students to remove fear factor among themselves from the disease like cancer if it is identified timely and cured in proper manner, they motivated students to be positive in all kind of situations and not to loose hope or bring negativity if they face any such situation in future</p>
