FORM A

Proposal :

- **Name Of the event to be organized :** Plantation Drive

- **Date :** January 30, 2019

- **Time :** 11:30AM - 12:00PM

- **Venue :**

- **Organized By:** Receptionist

- **Motivation for the activity :** • Without trees, there would be no life on this planet. This was the motivation behind the activity, to contribute to the environment. Tree plantation was symbolic in its own way and indicated that the youth are interested in investing time and effort for a better tomorrow.

Form B

Part 1

Aim of the event :

Without trees, flowers and vegetation, the urban dwellers life is prone to melancholia and depression.

Planting a tree has long been a suggestion for making Earth greener and its people healthier. We all know that trees are brilliant cleansers. A movement is required towards a deeper commitment to environmental protection through planting new trees and taking care of the existing ones.

The benefits of trees cannot be belittled ever. Besides producing oxygen and removing carbon dioxide and contaminants from the air, trees have many other social, economic, and environmental benefits.

Having already set the precedent of being a member of the Eco Club, RDIAS maintained its commitment towards the environment by planting trees on campus.

Other than the numerous benefits which it has to give to the environment, the presence of trees brings along shade and greenery which soothes the stressed out minds! The benefits of planting trees are multifold:

- Trees clean the air by producing oxygen
- Trees are effective sound barriers
- They become dustbins for harmful gases
- Trees act as windbreaks
- They fight soil erosion
- Trees decrease respiratory problems

Part 2

Abstract :

RDIAS continued its tradition of preserving the nature by planting sapling of palm, areca palm and hibiscus in campus. Around 15 volunteers along faculty members took part in the well-orchestrated plantation drive. The volunteers planted saplings at designated spots in the garden area in the college. Tree plantation is a harbinger of prosperity. Plants eliminate the pollution and are beneficial for the health, too. This would let our coming generations lead a healthy life. The number of saplings planted is immaterial, what matters the most is to pay meticulous attention for their nurture, protection and growth. We must take care of them like we care for our children. Tree plantation is not just something that should be done; instead, it is a necessity, the urgent need of the hour. Planting of trees is especially important to protect our environment against air pollution and global warming. Saplings were planted in campus which already holds over 200 plants. As a famous saying goes, "Even if the world was to end tomorrow, I would still plant a tree today."

Plant a tree and get air for free.

If you cut a tree you cut your life

The tree is your friend

Feel free to plant a tree

Trees are the roots of all living

A tree that stay, keep flood away

Protect the trees

There is no life without Green

Fresh air from a tree let us be

Take care of the trees, they will take care of you

Tree plantation was symbolic in its own way and indicated that the youth are interested in investing time and effort for a better tomorrow.

Part 3

Conclusion

"Environment education cannot be confined to plants and animals or even conservation; its aim must be to open to students the interconnectedness between living and non-living things in space as well as time."

The Social & Heritage Club, Prayatna at RDIAS has done exactly this!
