#### Summary

### **It feels good, It makes me Proud, I am a blood donor.**

There could be many reasons to donate blood for everybody but its our civic duty because it can save a precious life and some day, I may need someone to do the same for me, on that day, I would not hesitate to take it, so blood donation is important for maintaining an adequate blood supply in our community. To make this substantial, Social & Heritage Club of RDIAS organized a Blood Donation Camp on April 03, 2019 in association with Human Care Foundation & Red Cross Society in which a team of blood bank team comprising doctors, nurses, and technicians visited the camp. The event started by welcoming the team from Red Cross Society & Human Care Foundation followed by the registration of the students by filling a form, pre-donation screening, blood donation and post blood donation care. There were 121 students and faculty members who registered for the donations and 60 students were allowed by doctors to proceed for blood donation after screening. The donors actively contributed in this kind & generous event. The coordinators from Human Care Foundation & Red Cross Society coordinators appreciated the efforts of the institute and congratulated the authorities for successfully motivating students and faculty by creating awareness about the benefits of donating blood.
