Management Development Programme on "Artificial Intelligence (AI) for Educators"

TITLE	Management Development Programme on "Artificial Intelligence (AI) for Educators"
Date	Jul 27, 2019 - Jul 27, 2019
Summary	The landscape of education has been rapidly changing with global economy demanding new skills and continued breakthrough in technology are some of the factors impacting education. As now that the information is readily available online, the educational institutions need to bring about continuous changes to prepare the students for future in order to continue to be relevant. The emergence of Artificial Intelligence has impacted on education offering multiple possibilities to reformulate the curriculum and the channels to deliver it. Artificial Intelligence can provide a platform where learning is fun along with a personalized touch and also suitable for students having learning disabilities.

The MDP on Artificial Intelligence (AI) for Educators deliberated upon the following aspects :-

1.   How can we make sense from AI

2.   Why has CBSE implemented AI in schools

3.   How can we club AI and Education

4. AI in Schools

Prof. Pant deliberated upon the role played by AI and how it is pertinent in Education. This enabled the participants to understand its importance and need to keep abreast with the ongoing changes in the curriculum so that the pedagogy also changes.

Furthermore, AI and Learning Analytics in Teaching and Research were minutely explained by Ms Bhajneet Kaur, who guided the teachers to use analytical tools to their advantage while moving into a techno-savvy world, from the existing traditional system, to a faster click based system.

Thereafter, a hands-on session was conducted by Mr. Shashidhar Bhat for the teachers who got a fair amount of understanding on how to use AI and also cloud computing to store data, like IBM
