Title	Submission of Dossier for "Industrial Visit at Hindware for BBA "
Resource Person/Facilitator	Mr. Anirbhan Ghosh (Manager-R&D)
Date	07/10/2019

Summary

RDIAS organized an industrial visit for the students of BBA Semester 1, to orient them with real industrial practices and processes. With this approach in backdrop, students were taken for a visit to HSIL Limited, Bahadurgarh to provide them with the insight of manufacturing and processing of sanitary products.

22 students were accompanied by two faculty members. The facilitator showed around the students and informed them about functioning of plant. Students were shown the basic raw material used for manufacturing of the sanitary wares. The students were introduced to production unit, labeling unit, research and development unit and quality control unit. Students were also made to touch the samples of quality control.

Students asked various questions related to the working and establishment of Hindware. The cleanliness in the plant was remarkable; the resource person appreciated the queries put forward by the students.

It is rightly said that see & know is better than read & learn. The visit helped the students to understand the practical implementation of management concepts related to production , quality control and supply chain management within a manufacturing plant. The overall visit was really a value adding learning experience both for students and the faculty members.
