

Data Analysis and Governance

TITLE	Data Analysis and Governance
Date	Sep 24, 2020 - Sep 24, 2020
Summary	<p>RDIAS organized Alumni Class Room Lecture for the students of BBA and MBA on September 24,2020. The session was taken up by, Ms. Barinder Kaur, Data Governance Consultant Apple. Inc. Alumnum, MBA 2009-2011.</p> <p>The session serves twin objectives , at the first instance session with alumnum strengthen their bond with their Alma Mater and at the same time , the session acquainted the students about the buzz words of data analytics and governance. In almost every industry, the use of analytics is intensifying these days, so it becomes utmost important for the students to have the understanding of these concepts. The session provided them the core understanding of the roles and responsibilities of a data analyst and their role for data governance.</p> <p>Students learned that today data is the most crucial asset for any organization and if organization ensure readily accessibility of high-quality data then it can strive for competitive differentiation and healthy business operations .Madam, elaborated that data governance is all about increasing data understanding across a business enterprise, and at the same time demands for an encouraging collaboration to get the most from your data assets. An organization with strong data governance will create more educated users who can solve business issues and uncover unseen issues and opportunities in an efficient manner. Therefore, today, data governance is a critical initiative for many organizations.</p> <p>Apart from giving theoretical background, the session also conveyed the importance of different certification courses which a student can undertake to become a good data analyst. It was indeed an interactive session wherein students discuss their queries and concerns. At the end, speaker of the session wishes all participants good luck for their career and life ahead.</p>
